Hudson High School, Hudson

Governor Strickland is currently developing a proposal for education and school funding reform. As he said in his State of the State Address, "We need to identify the great strengths of our schools. There are features in our education system that the rest of the world seeks to emulate, and we must build on these triumphs."

Please join us for a community discussion on what *you* want for the future of public schools. A short video regarding the changing climate of Ohio schools will be shown followed by an open discussion of your ideas on education reform. This is a unique opportunity for your voice to be heard by those creating the policies.
